

MINOR PROJECT -1

1A. Find applications which are vulnerable for SQL injection

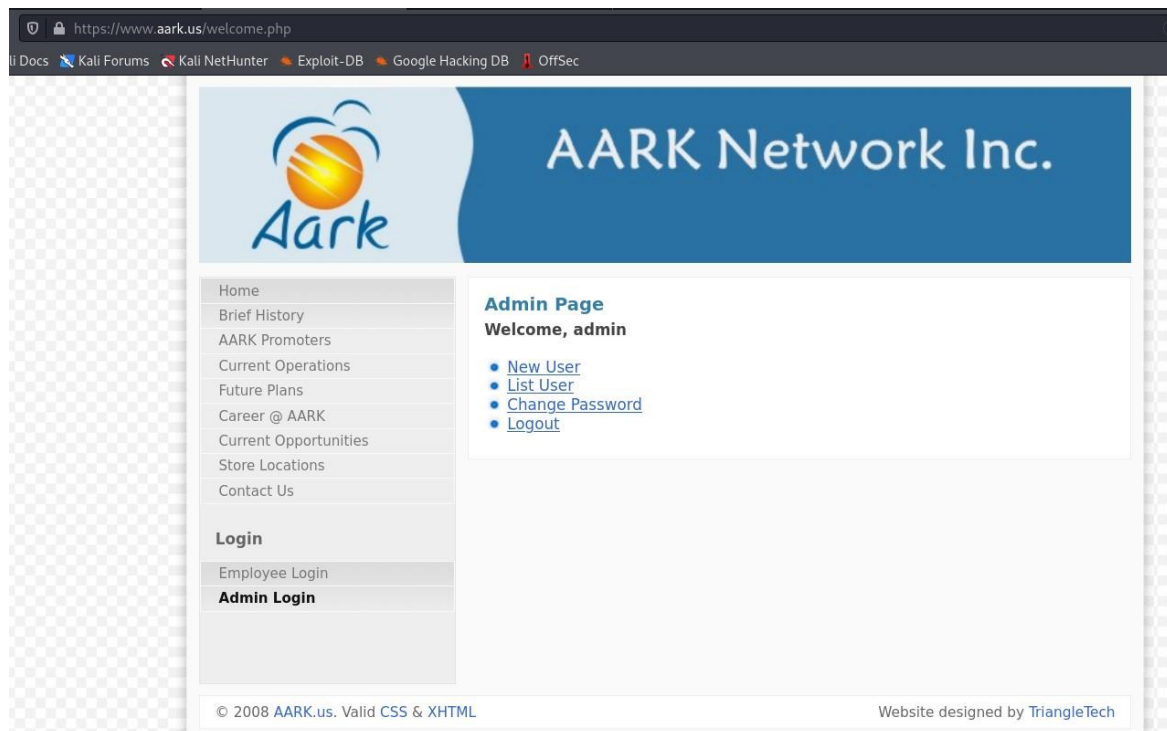

Step-1: Get a syntax from Google Dorks and paste it into google search to get vulnerable websites containing login page.

Step-2: Choose a website to perform SQL injection.

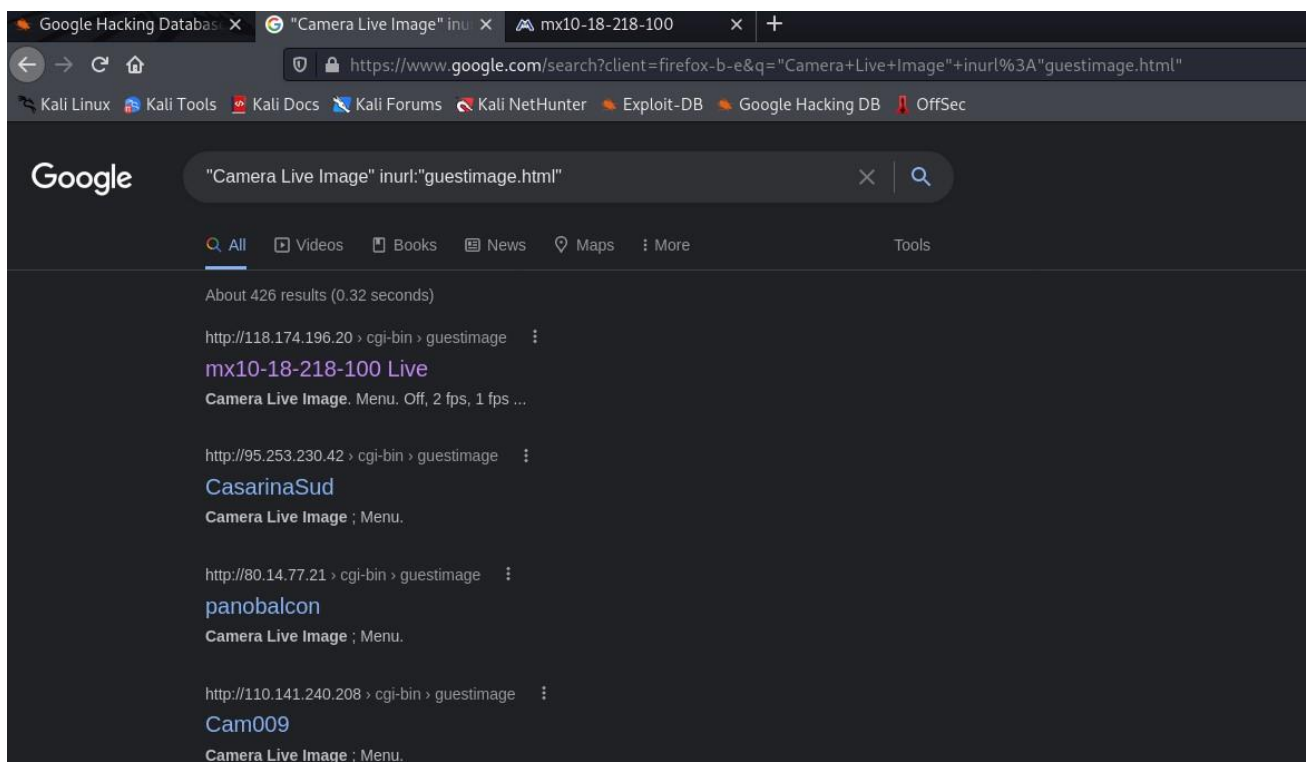

Result: Login Completed

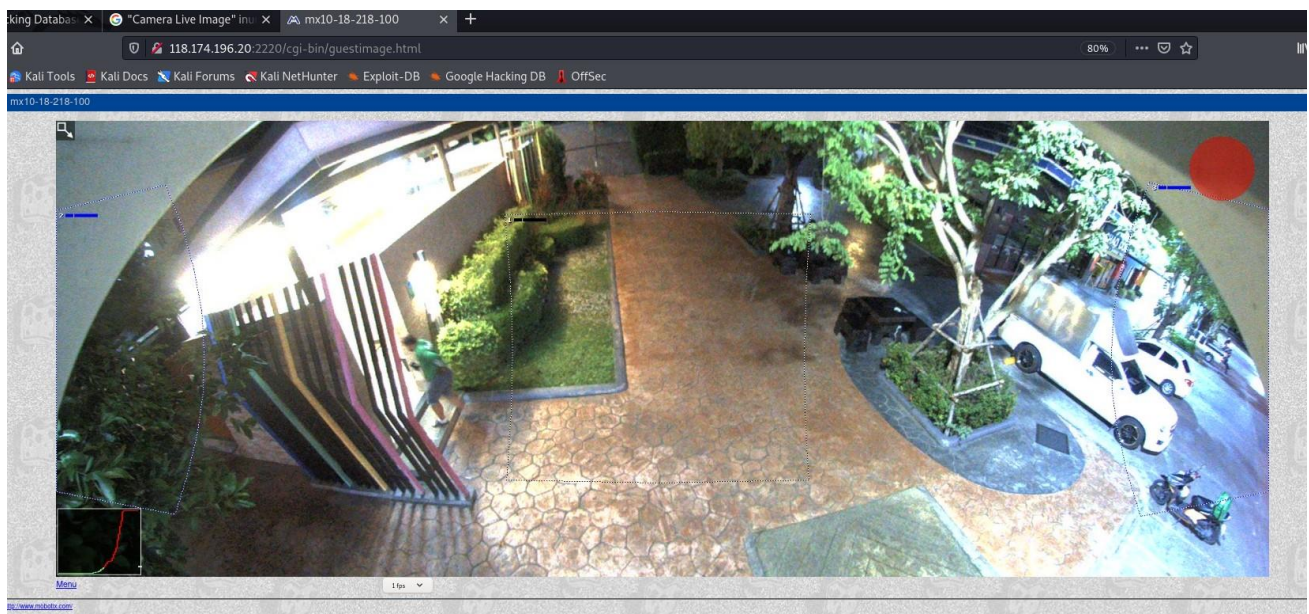

1B. Find vulnerable live cameras

Step-1: Copy a suitable syntax from Google Dorks to find vulnerable devices which are connected to the internet.

Step-2: Open a link for accessing vulnerable cameras

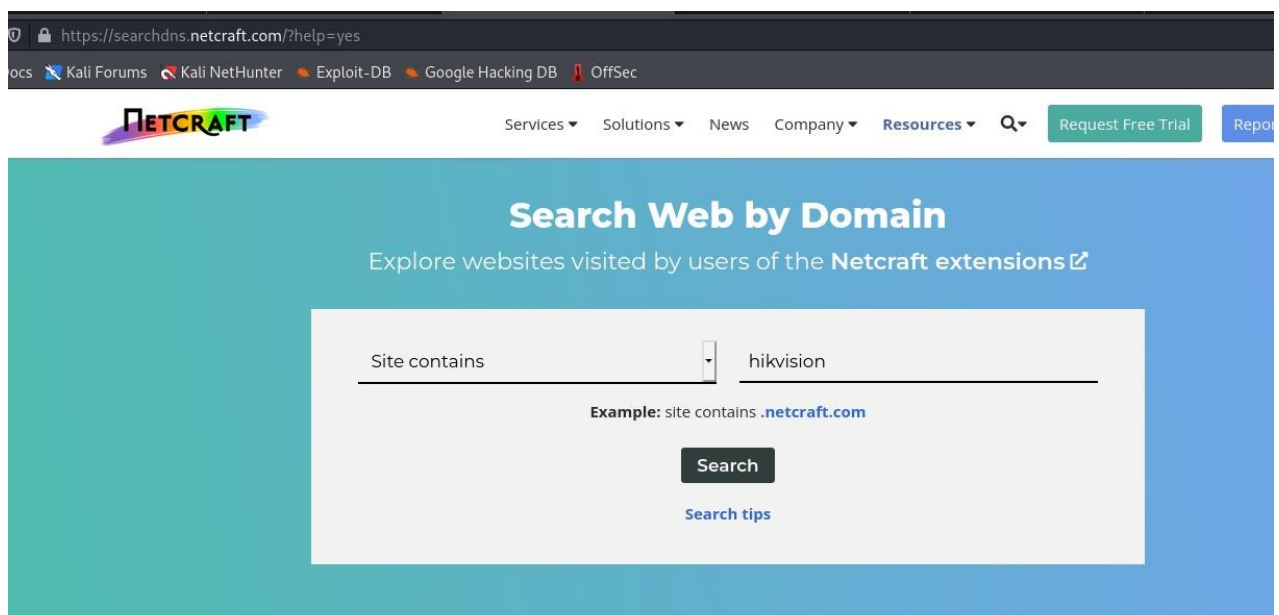

Result: Some cameras are not protected and can be accessed by anyone.

2. Find subdomain details of a random target.

2A. Using Netcraft

Step-1: Open searchdns.netcraft.com and search the details of the target (hikvision).

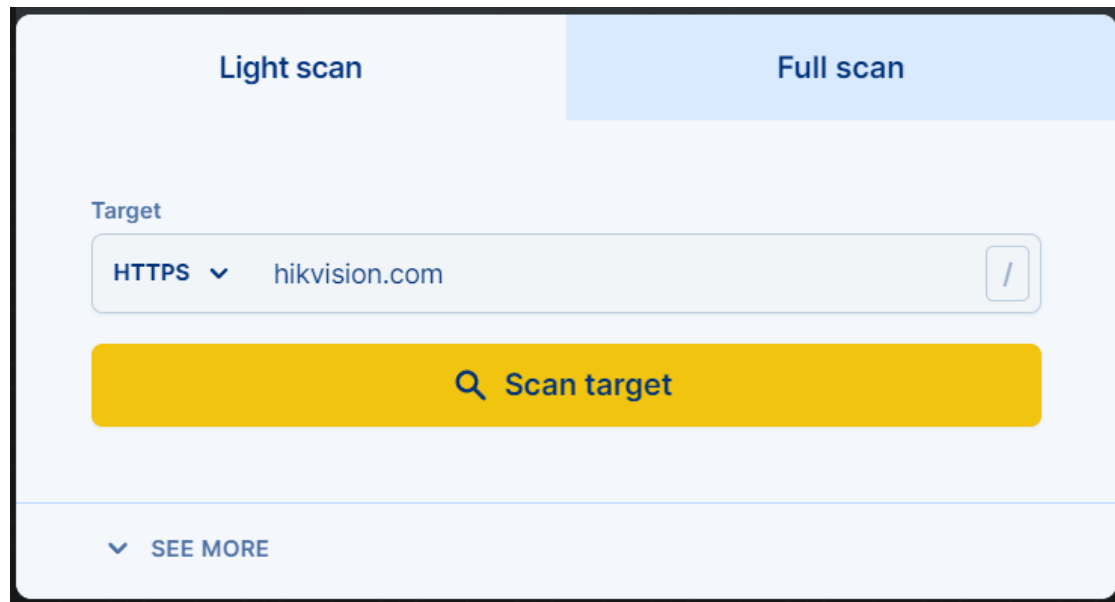

Result: Search completed.
